

Murray Parkway Bank Restoration I-215 to Bullion Street Jordan River

Project by
Salt Lake County Engineering Division

Funded by
Salt Lake County
in cooperation with Region VIII EPA
and Murray City

Total Cost: \$214,596
Completed 1999

Right: Photo shows typical bank conditions before restoration.

Below: This project featured re-grading vertical banks to 3:1 slopes and re-vegetation with willow at the base and seed mix on slope. The riverbank is well vegetated and stable after 5 years. A nearby stormwater drainage system was also re-contoured and revegetated as part of the project.
